

Africa-EU Water Partnership Project

Anton Earle, Director, Africa Regional Center, SIWI

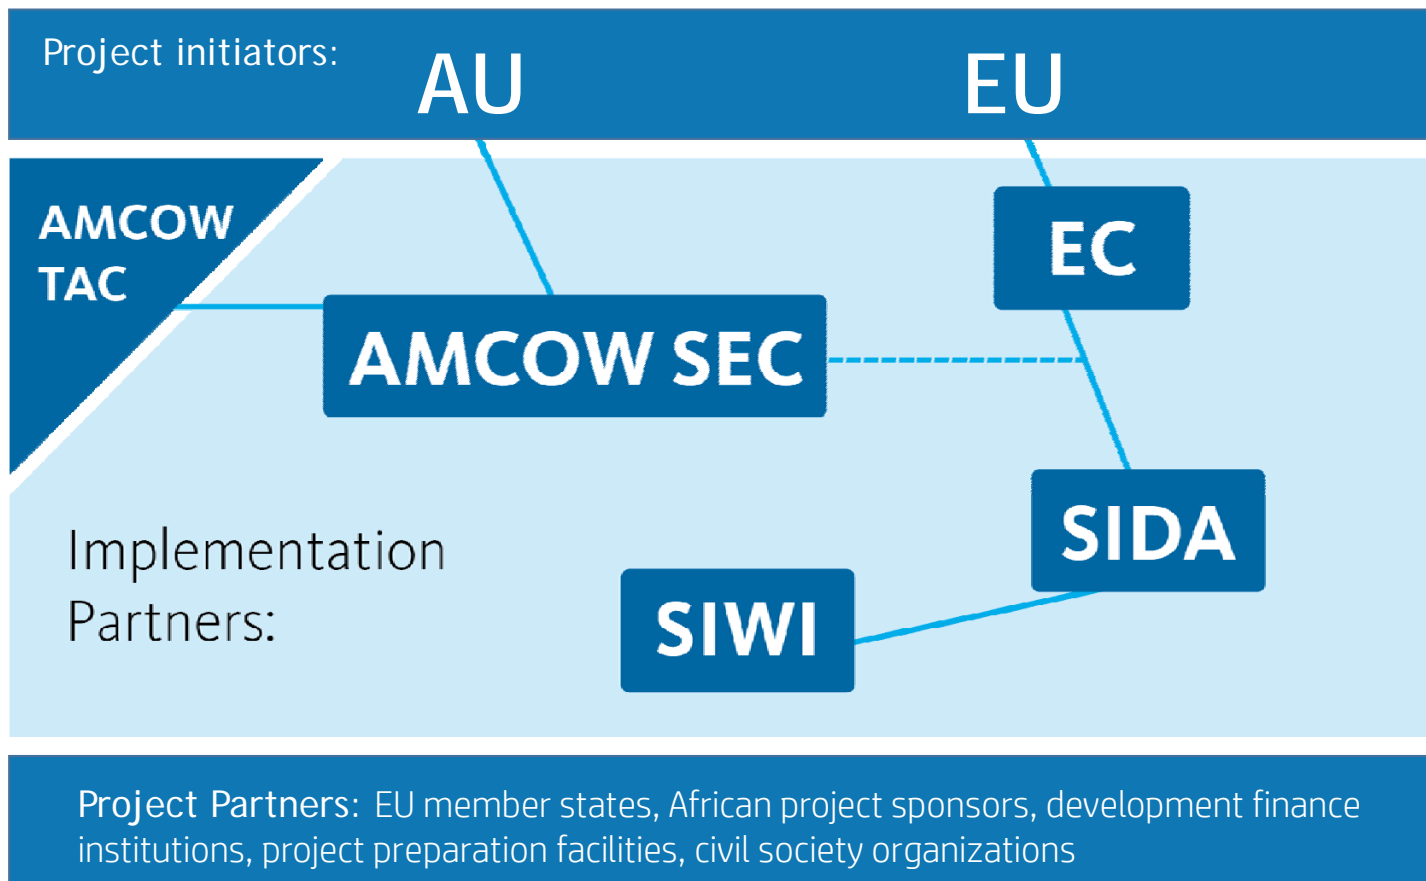

AEWPP - Background

- In 2002, EU and AU established EU-Africa Strategic Partnership on Water Affairs and Sanitation
 - Support achievement of MDG targets relating to water supply, sanitation and water resources management
 - AEWPP is a continuation of this partnership
- 

Achieving Africa Water Vision 2025 + SDGs

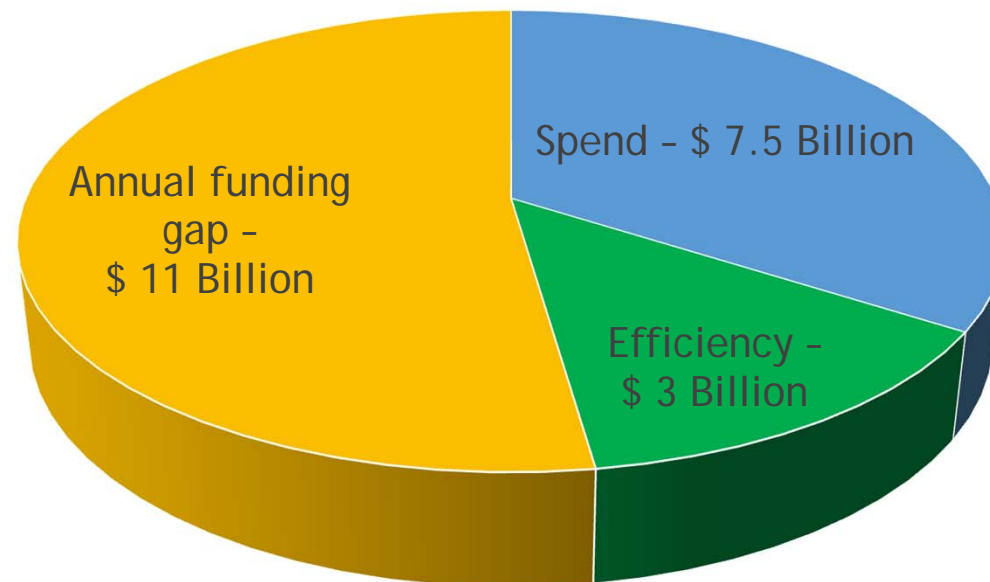

AEWPP Structure

The challenge

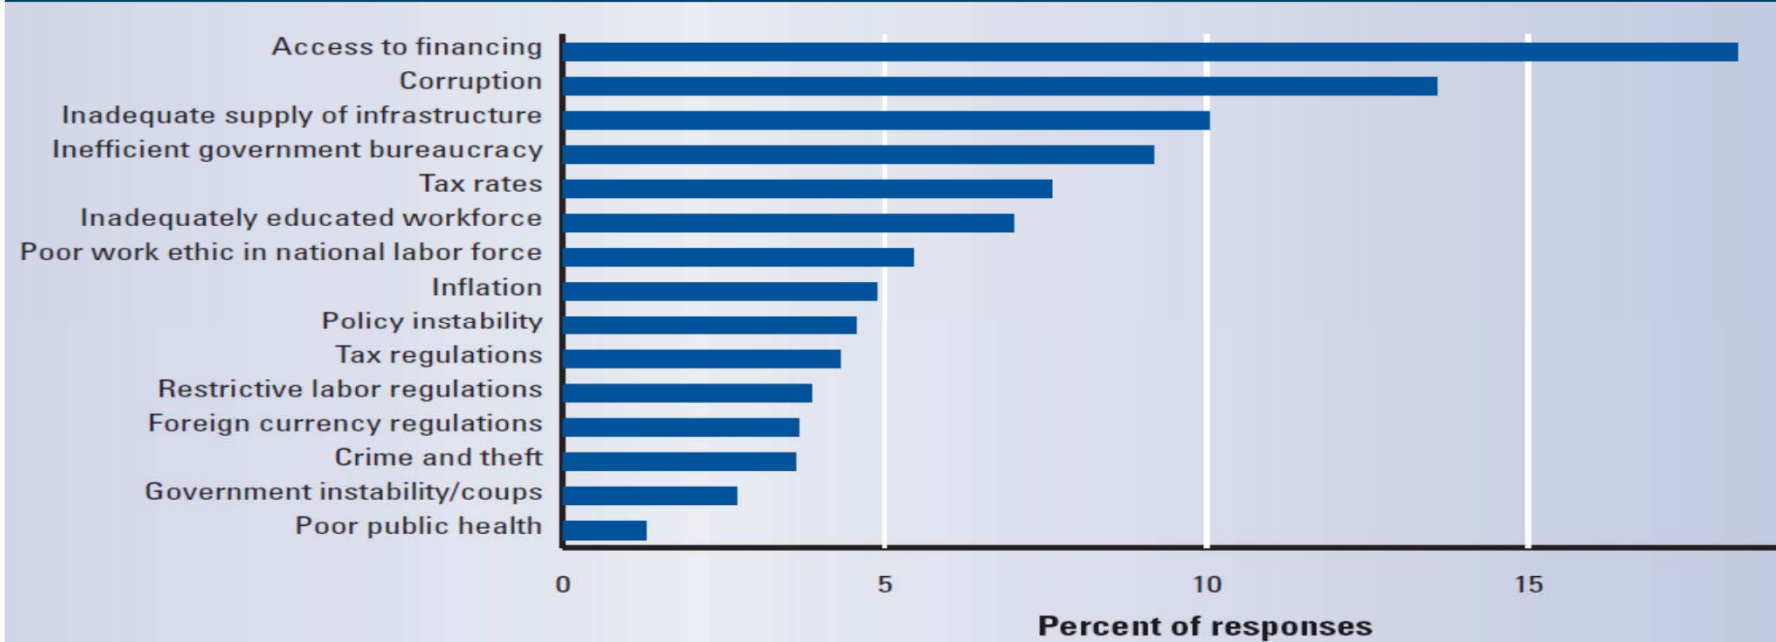

\$ 22 Billion USD Needed

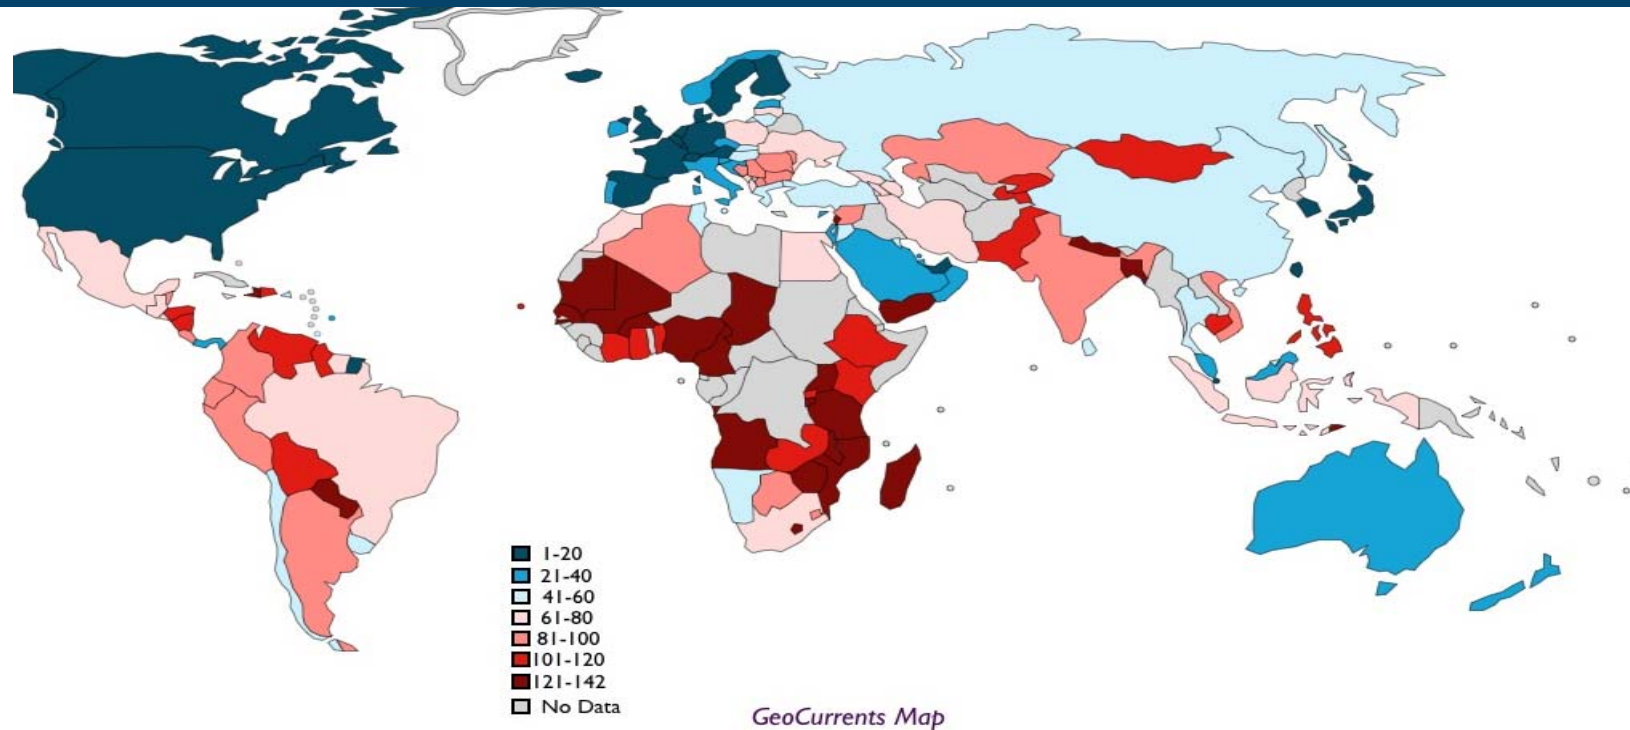

Matching demand and supply

Most problematic factors for doing business in Sub-Saharan Africa (WEF, 2012)

Matching demand and supply

Global infrastructure rankings (WEF, 2012)

Matching demand and supply

Sustainable development in Africa

- Concepts to be developed into viable projects
- Substantial funding yet to be mobilized

The AEWPP approach

AEWPP components

1. Sustainable water infrastructure:

- Identify and prioritize infrastructure projects
- Advance financial viability of at least five projects

2. Capacity building for water sector governance:

- Identify capacity development needs
 - Develop tools for integrated planning
 - Knowledge management
- 

Projects

- Regional focus
- Address water, food, energy security
- Elevate cross cutting issues including poverty and gender

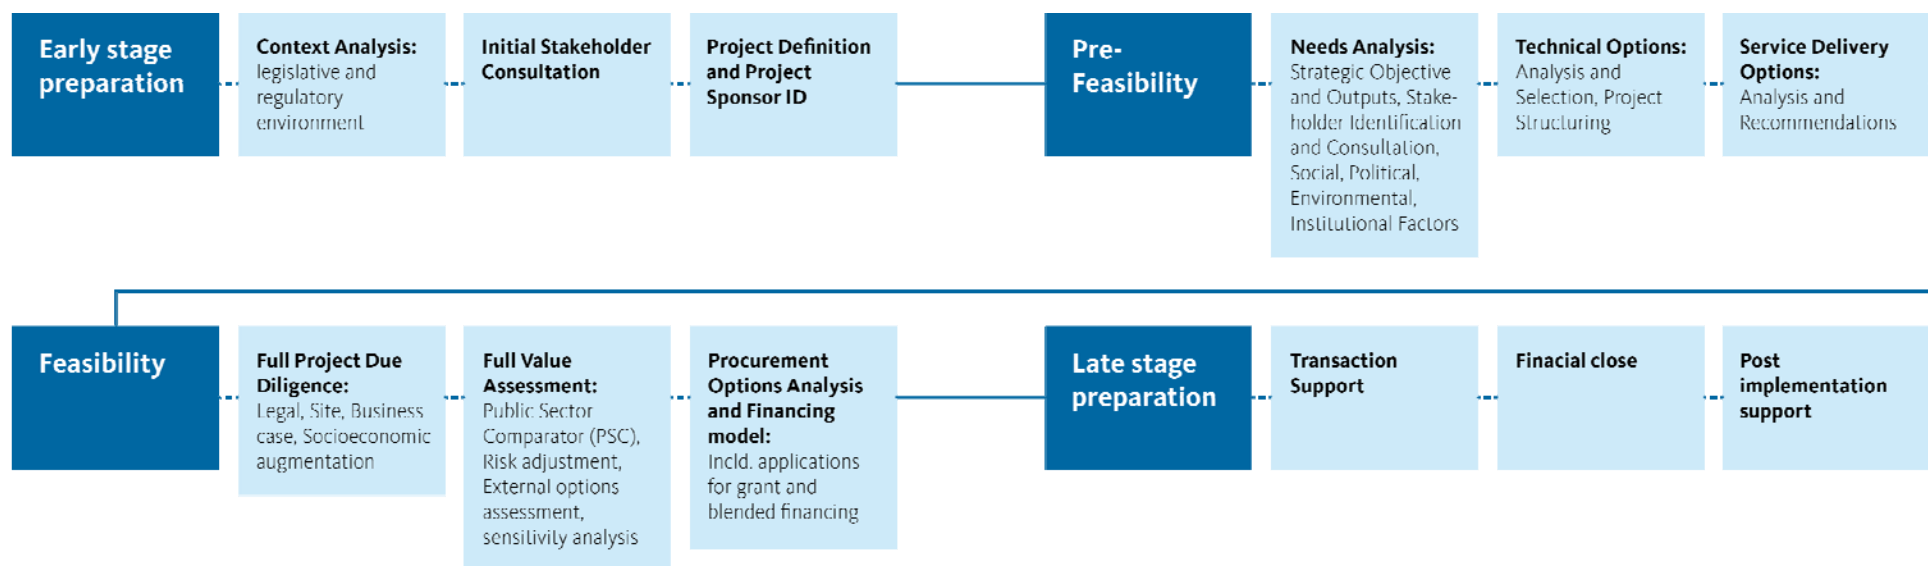

SIWI Project Support Team

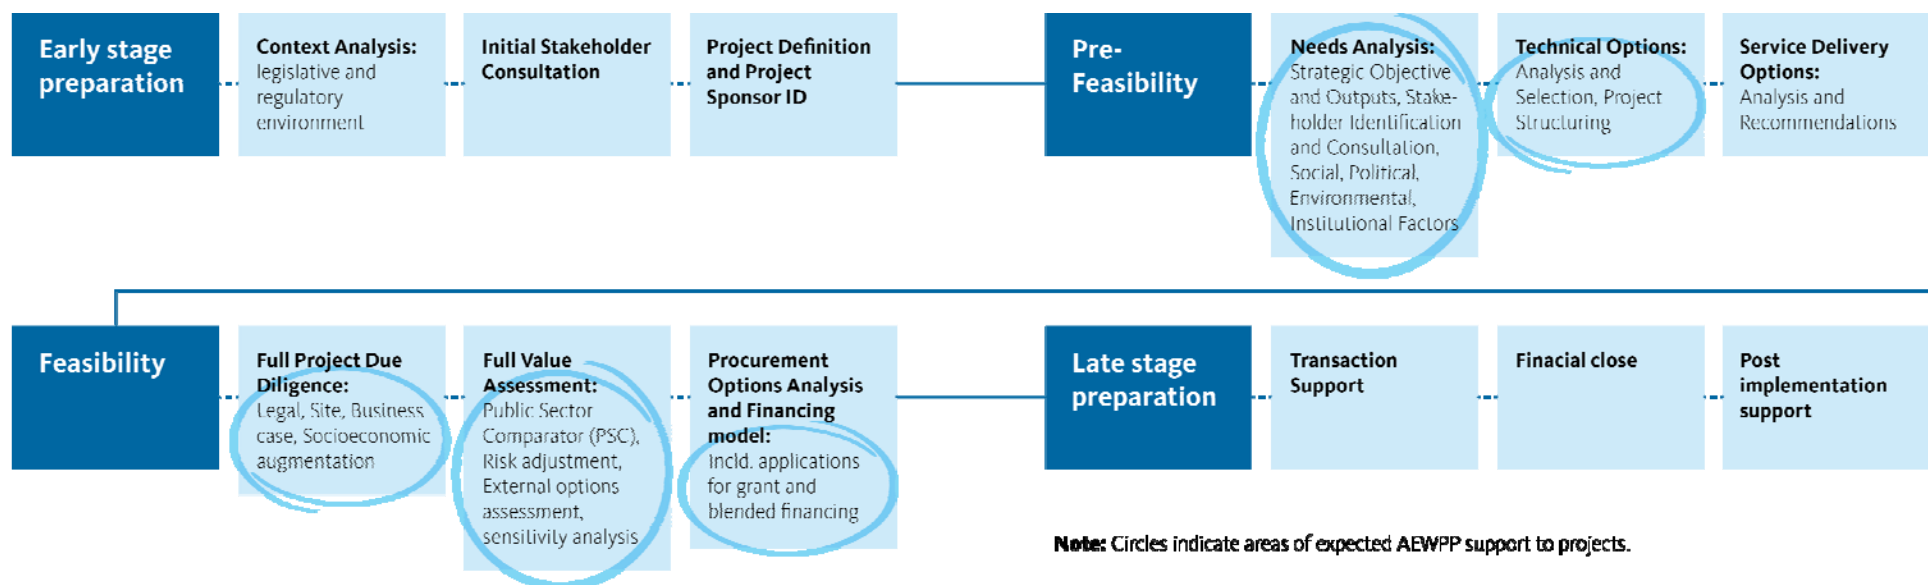

- Resolve targeted challenges
- Towards implementation
- Improve internal capacity
- Access to blended finance

Adding value

Adding value

Project selection criteria

1. High priority water projects (regional nature, cross-cutting issues, nexus potential)
 2. Primary feasibility criteria (in a DFI pipeline, with government sponsor, political agreement in TB cases etc)
 3. Intervention assessment (enhance financial viability or the development impact)
- 
- A solid blue decorative wave graphic that spans the width of the slide at the bottom, starting from the left edge and ending at the right edge, with a slightly irregular, wavy top edge.

Completed steps

- Project Support Team recruitment (including Francophone finance expert)
- Mapping of ODA for water infrastructure
- Identification of relevant partners (DFIs, PPFs, RECs)
- Outreach and request for project proposals
- Development of pipeline of projects (currently strong in east and south, emergent in central & west, lacking in north)
- Visibility activities - World Water Week, Africa Water Week
- Results monitoring and dialogue platform

Next steps (2018-2019 April)

- Finalize pipeline of projects (12 to 15 across the five regions of Africa)
 - Identify intervention area for each project
 - Enhance financial viability or the development impact of each project & identify capacity building needs
 - Promote projects at international and regional events (WWW, AWW, EU-AU JAES, others) and reach out to investors
 - Conclude at least five successful infrastructure projects - one in each region of Africa.
- 
- A solid blue horizontal bar at the bottom of the slide, with a slightly wavy top edge.

Thank you
