## □ Working with the African Regional Power Pools (ARPP):

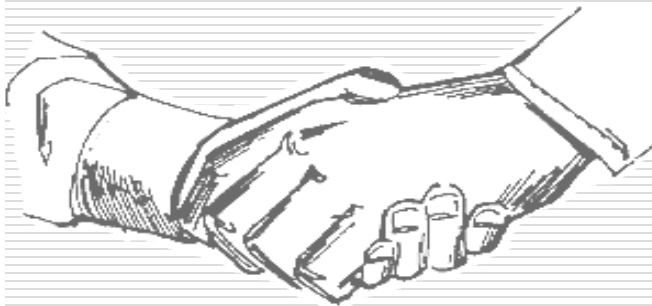

- In 2011, ICA produced a report on the status of the ARPP;
  - Following some consultations with ARPP and some donors → need to update the report → Report to be updated next year;
  - The report contains detailed data on the status of the regional Power Pools (tariffs, capacity, plans, etc.);
  - The updated report will include the status and trends of regional markets development, private sector participation potentials and requirements, etc.

## ❑ **Atlas of Africa's Energy Resources:**

- A compendium of updated and illustrated information on energy sector through satellite images, maps and photographs;
  - informative facts and figures;
  - succinct narrative description and analysis of Africa's Energy issues as well as judicious use of case studies and country profile (all African countries);
  - Expected to contain around: 200 maps, 100 satellite images and hundreds of graphics and photos;
  - Around 300 pages;
  - Expected publication: March 2016.
